Socrates by Universitas AI
Your Research Superpower

Socrates is a breakthrough AI research engine pioneering state-of-the-art intelligence for institutions, scientists, and innovators.

Instantly search, analyze, and extract insights from millions of academic papers from leading journals and research institutions. Built on an advanced multi-model framework, Socrates delivers evidence-backed intelligence grounded in the latest trusted sources—not speculation.

Augmenting standard AI training data, Socrates provides real-time, research-grade intelligence based on full-text understanding of academic literature—extending context beyond static models to explore new frontiers of knowledge.

Revolutionize your research with Socrates—so you can search less, discover more, and trust every answer.

Features:

- Contextual Search Across Academic Papers & Scientific Articles
- Multi-Source Reasoning with Full-Text Paper Analysis
- Advanced Paper Evaluation and Relevance Ranking
- Seamless Batch Download Papers for Offline Access
- Answer Research Questions with Automatic Citations
- Accelerate Literature Reviews and Meta-Analysis
- Extend Research Context with Real-Time Intelligence
